

Pinnacle grade

A Comprehensive Digital Gradebook for K-12

For 25 years, Pinnacle Grade has been the leading classroom management solution preferred by educators.

Pinnacle Grade transforms traditional classroom grading functions to give educators, administrators, parents and students a comprehensive view of student progress. With integrated standards-based grading and assessment management tools, **Pinnacle Grade** provides a one-stop gateway to every data point needed to build and deliver high-performance learning plans for every student—maximizing teacher instructional time and district budgets.

Pinnacle Grade is everything a digital gradebook can and should be. Using the latest in browser-based technology, **Pinnacle Grade** makes it easy for teachers to enter assignment and assessment data, and provides instant calculation of individual student, subgroup and class standards mastery.

Key Benefits

- Increase student performance and teaching effectiveness**
 Highlight topics that need more attention and identify students that may be deficient in certain areas.
- Enhance teacher productivity**
 Focus on instruction, not data entry and score calculations. The intuitive interface gives teachers a fast and easy way to enter and track grades and attendance. No file uploads or complicated processes means more time analyzing individual student and class performance.
- Quantify learning proficiency towards meeting state standards**
 Automatically calculate scores that demonstrate proficiency toward each applicable standard. Rather than relying on simple averages, now teachers and parents can assess how students are progressing in acquiring knowledge with each quiz question or homework assignment.
- Empower parents for more positive and proactive engagement**
 Help parents stay involved by sharing select student and coursework information including grades, attendance, homework, assignments, and disciplinary information via online portal. Enable parents to sign up for automatic emails alerting them to missed classes or falling grades.
- Improve curriculum, policies and teaching methods**
 Analyze trends in student and school performance and gain insight into the implications for curriculum, instruction and professional development changes.

Key Features

► Create Assignments

Teachers can specify categories, scoring attributes, color coding, weight and due dates, or attach predefined assessments and standards objectives to assignments.

► Share Information with Parents

Parents can actively engage in student progress with real-time updates of grades, attendance, discipline, or assignment and test support materials for all students in their family. Administrators and teachers have control over what is displayed in the Parent Portal.

► Manage Attendance

Comprehensive tracking and reporting features ensure teachers minimize administrative tasks and focus their energies on instruction.

► Reporting & Analysis

Choose from one of 70+ pre-configured, customizable reports. Reports can be tailored through the use of SAP Crystal Reports® – the underlying reporting engine for Pinnacle Grade.

► Manage Grades

Easily insert comments, view attendance or analyze student performance. Updated grades are automatically calculated and available for teachers and administrators, as well as students and parents.

► Standards-Based Proficiency Measurement

Import and organize standards and easily link to relevant Assignments. Correlation between Assignments and the related standards-based proficiencies can be easily evaluated, increasing teacher effectiveness.

► Parents and students can track progress through the Parent Portal
